1. Springer Publisher: One of 2 largest publishers

• Springer opeoned Vienna office in 1924, branch in New York in 1964, followed by Tokyo, London, Paris and Hong Kong shortly thereafter. The company quickly became one of the world’s leading scientific publishers.

• In Oct.2008, Springer purchased BioMed Central, an open access publisher, making Springer, the world’s largest open access publisher.

• In 2009, the sale of Springer to EQT, a Swedish financial investor, & GIC, investment vehicle of the government of Singapore, was announced.

• Healthy organic growth and recent acquisitions, embrace of technological advances (i.e. ePublishing) and its dedicated employees provide the basis for sustainable service to the global scientific and professional community.
1.1 Springer SBM & STM (Science, Technology & Medicine)

Springer serves the research and academic communities around the globe, publishing journals, major reference works, books, and digital media.

Springer Science+Business Media is a leading global scientific publisher & a provider of local professional publications, especially in Germany and the Netherlands.

Springer has operations in about 20 countries in Europe, the USA, and Asia, and more than 5,500 employees.

In 2010, it generated annual sales of around EUR 866 million.

In science, technology and medicine (STM) sector, Springer publishes ca. 2,600 journals & more than 7,000 new books a year, as well as the largest STM eBook Collection worldwide.
Springer is aware of its role in the distribution of scientific information and access to knowledge and research. Springer makes a concerted effort to ensure that the knowledge we manage is also accessible in those parts of the world that are still developing. Springer participates, often in leading roles, many efforts and initiatives which facilitate access to scientific information, or to disseminate this information further and wider.

Springer participates in numerous ‘Tertiary Level’ Philanthropic Projects - in cooperation with Governments, Non Governmental Organizations, Donor and other Aid Organizations. The goal is to help by providing access to journals content to researchers in the third world, who do not have the possibility for access because of lack of financial resources at their institutions.

Springer offers an economically viable pricing model for university and research institution libraries in selective developing countries to access Springer’s electronic publications online via the internet.

For a full description of the initiatives we participate in and for a list of eligible countries, please visit our website at: springer.com under “Our Services for Developing Countries Initiatives.”

Some of the more noteworthy initiatives are:

- HINARI Health Inter Network Access to Research Initiative
- AGORA Access to Global Online Research in Agriculture
- TEEAL The Essential Electronic Agricultural Library
- INASP/PERI
- Authors coming from 90 developing countries are exempt from fees for Open Access journals.

GlobalScienceJournals.com –
Global visibility for your journal

Are you looking for a reliable hosting option for your scientific journal that offers permanent archiving?

GlobalScienceJournals.com (forthcoming in July 2012) is the right solution. Based on Springer technology, GSJ is a new host for international journals covering all subject areas in science, technology, medicine and social sciences & humanities.

All GlobalScienceJournals.com journals are fully open access. Open access publishing makes articles immediately and permanently available online for everyone, everywhere. All articles are published under the Creative Commons Attribution (CC-BY) license, enabling authors to retain copyright to their work.

Features Include:

- Search Engine Optimization (SEO): usage analysis of our platforms shows, that well over 50% of the traffic comes from search engines, such as Google. Therefore Springer constantly ensures that GlobalScienceJournal.com is updated and optimized for search engines.

- You remain the publisher: you oversee the editorial board and retain full responsibility for the content of your journal, including peer-review and production.
5.5. Hosting a Journal?

- For journals in your local language – no restrictions on language or alphabet with search pages in the World’s major languages.

- A home for your journal: individual GSJ pages for each title present your journal to the worldwide audience.

- Continuous Article Publishing (CAP) model for fast accessibility: articles are published as soon as they are ready – no need to wait for issue building. Articles can be found, accessed and cited as early as possible: maximize citations.

- Digital Object Identifiers: Springer makes sure the articles of your journal are DOI registered – for easy citation and indexing.

- Smooth access and positive user experience with state-of-the-art hosting technology.

- Let the users rank your journal. A public rating system will be available soon. Most highly ranked journal will be awarded.

- **Long term archiving** is a major responsibility of Springer. We cooperate with national libraries to ensure long term permanent access to electronic j.
Springer’s Marketing Service

- **E-Mail Marketing**
  - E-mail campaigns are efficient tools for increasing journal usage, as well as communicating news about our journals.

- **Web-based Marketing**
  - Springer ensures a prominent visibility and findability of its products on the world-wide web:
  - SpringerLink Banner Ads: SpringerLink, receives over 400 million page views a year. The new arrival of the journal on the SpringerLink platform will be extensively advertised on the content pages of related Springer journals.
  - Your content has to be online and it has to be “findable.” Springer has chosen to partner with GoogleTM. Our online platform SpringerLink hosts nearly 3 million online items and we have proactively worked with GoogleTM to have our content thoroughly identified, crawled, and indexed. As a result, Springer content consistently shows up exceptionally well in search results and researchers can readily find our abstracts and articles by searching with GoogleTM.
Springer’s Marketing Service (2)

- **Press Coverage**
  - Springer employs a full-time Global Public Relations department as well as freelance scientific writers. Both the general and scientific news media regularly pick up Springer press releases and run stories based on them. We would issue joint press
  - Publishing of Social Transitions/Transiciones Sociales (SOTA) Journal 37
  - releases upon the beginning of our partnership. Examples would also include: Awards for Editors or awards for research published in the journals.
- **Market Research (Including Reader/Author Surveys)**
- **Exhibitions**
  - Springer is represented at approximately 280 end user conferences annually and in addition is represented at around 100 library conventions worldwide
  - At major events we feature our journals online through electronic display & sample copy display, and electronic banners. to provide trial access to the journal on SpringerLink and to capture emails for TOC sign-ups. These meetings are attended by marketing & editorial personnel to ensure best representation.
- **Abstracting and Indexing Services**
  - Springer regularly reviews and monitors the status of each journal with our contacts at these services. A special department dedicated to A&I takes care on a daily basis of all indexing issues in close contact with representatives of the indexing services. A central focus of this department is working to make sure your journal is listed with ISI and ensure the development of its Impact Factor.
- **Web 2.0**
